PROFILE

Highly motivated Frontend Developer with 4 years of experience in designing and building dynamic web applications using modern frameworks like ReactJS and VueJS. Skilled in collaborating within teams to deliver user-focused solutions, with a strong emphasis on creating intuitive and engaging user experiences.

WORK EXPERIENCE

iO Digital Agency September 2024 - February 2025
Frontend Developer Graduation Internship

- This is where I did my graduation internship. For 6 months I worked on designing and creating an engagement survey tool to measure user feedback.
- By understanding the users, I delved into the problem and designed a fitting solution. Then I developed it using ReactJS, Material UI and a database to make sure this tool works in the real world.

043Web August 2023 - January 2024
Front-end Developer

- Created more than **40+ unique websites** for unique clients using WordPress. The art of truly understanding what the client wants and exceeding their expectations by delivering a creative and sleek design that represents the brand.
- Going beyond what is necessary to exceed the client's needs.

Boxplosive Tilburg February 2023 - June 2023
Frontend Developer Internship

- Here I worked as an intern for 6 months and I was tasked to research on how to implement NFT's within the current Loyalty Program that Boxplosive has to offer. Brainstorm, Create sketches, wireframes, prototypes in Figma, Coding the design with Blazor dotnet and presenting my tool in daily meetings.

Bolt IT • Parttime February 2023 - June 2023
Front-end Developer

- Here I redesigned their website using VueJS and Tailwind CSS in a more professional way, resulting in a **40% increase in customer visits** and conversions. I started sketching and wireframing initial designs and then transformed them into their current website.
